

HOME & COMMUNITY VISITATION GUIDELINES

If you have any questions, please feel free to call the Life Enrichment team at (715) 723.4437.

- All residents/clients will be allowed to have home/community visits, regardless of vaccination status.
- Please notify us ahead of time if you plan to take your family member/friend off our campus so that we can communicate with all individuals who will need to be aware.
- Due to the need to continue to restrict door access and ensure all persons entering/exiting our facilities are screened in and signed out, we ask that we are notified of all off-campus visits at least 24 hours in advance. We will need to have staff resources available to direct residents/clients back to their rooms, if needed. If an off-campus visit extends beyond our normal business hours, the person bringing the resident/client back will need to ring the doorbell at the main entrance to summon staff for assistance with returning the resident/client. There may be a brief wait associated with staff responding to the door, as those calls will go to our clinical staff who work “on the floor.” We ask that you please remain patient if waiting occurs.
- Home/community visits should be limited to private residences, private vehicles (such as going for a drive to see the sights), or outdoor public spaces (such as parks). Visits in indoor public places (such as indoor dining establishments) are strongly discouraged. If visitors want to treat their family member/friend to a food/beverage treat, we highly recommend doing that in a private residence, picnic-style outdoors, or from a drive thru that can be enjoyed in the car together. Indoor public spaces remain areas of high risk at this time.
- No resident/client, whether vaccinated or unvaccinated, should be taken to a private residence where anyone is currently ill or where anyone has had exposure to someone positive for COVID-19 in the previous 14 days.
- Off-campus visits between fully vaccinated residents/clients and other fully vaccinated individuals can largely be unrestricted at this time, so long as they do not occur in indoor public spaces. We ask that you please observe all good infection control guidance, such as hand hygiene and cough etiquette.
- Off-campus visits between fully vaccinated residents/clients and others who are not fully vaccinated should be limited to small groups, preferably from one household at a time. These visits require use of well-fitting face coverings and physical distancing to the extent possible, as well as good hand hygiene, cough etiquette, etc.
