April 2, 2021

Dear Residents, Clients and Families:

As part of an ongoing effort to protect the health and wellness of those we serve, Chippewa Manor continues to test employees for coronavirus on a regular basis. On Thursday, April 1, a member of our team tested positive for COVID-19. This was the first positive test among our employees since December 11, 2020. We immediately reported the case to our local health officials and initiated safety precautions.

While the staff member is not experiencing any symptoms, they are now quarantining at home, following Chippewa County Department of Public Health guidelines. Any residents or clients that may have had contact with this individual were tested and all results came back negative. All visitation and group events were suspended briefly while we awaited test results. We are happy to report that following the guidance of Chippewa County Public Health, we are now able to resume visitation schedules. If you have any questions about a scheduled visit or wish to make an appointment, please call our Life Enrichment Department at (715) 723-4437.

This incident reminds us that COVID-19 is still a very real and present threat in our communities. As we head into Easter weekend, I urge you to continue to follow the mitigation efforts (such as wearing masks, washing your hands frequently and maintaining social distancing) that have served us so well. The safety of our clients, residents, staff and all their families remains our top priority.

Thank you for your understanding and patience during these turbulent times. We are honored by your trust and appreciate the opportunity to serve you and your loved one.

Sincerely,

A handwritten signature in cursive script that reads "Jill Gengler".

Jill Gengler, NHA
